

Product Data Sheet Type: MC780

Group: ACCESSORIES Mounting Material

Mounting clips

For device : TO 220
Device mounted by : Clip
Material : Stainless Steel

Mounting clips facilitate the safe and efficient mounting of semiconductors to heatsink with the corresponding hole pattern. Especially for insulated mounting, a clip provides reliability by making screws and insulation bushes dispensable. Central contact pressure distributes the heat conductivity equally across the semiconductor/heatsink contact surface.

- Material: Stainless steel (1.4310)
- For cases: TO220
