

Product Data Sheet Type: MC725CLIPFÜRTO220

Group: ACCESSORIES Mounting Material

Mounting clips

For device : TO 220
Device mounted by : Clip Mounting
Surface : Bronzed
Material : Spring Steel

Mounting clips facilitate the safe and efficient mounting of semiconductors to heatsink with the corresponding clip groove see page 32-34 - Spezial Heatsinks or page 39-41 - Standard Extruded Hartsinks.

Especially for insulated mounting, a clip provides reliability by making screws and insulation bushes dispensable.

Central contact pressure distributes the heat conductivity equally across the semiconductor/heatsink contact surface.

- Material: Spring steel (C75)
- Surface: bluing
- Width: 9,1 mm
